

International Operations Director

120k plus benefits, plus generous relocation.

Due to strategic expansion this global engineering client now seek to appoint an experienced International Operations Director to take a lead role in developing an established brand, synonymous with build quality and durability, setting the tone and direction enabling the Company to build on its current success whilst improving efficiency and bottom line performance.

The ideal candidate will be a hands-on, time served operational leader with a solid track record of progression working from the shop floor into Senior Management.

You will be a natural driver and achiever with a demonstrable record of success in a senior manufacturing and/or engineering role.

This key leadership role will:

- Review and recommend improvements for the assigned divisions.
- Drive profitability and growth of the business.
- Have the ability to travel internationally up to 35% of the year.
- Assess and suggest enhancements to our distribution and marketing activities.
- Review and monitor the performance of the business model for profit generation from our spares and maintenance business.
- Assume accountability for profitability of assigned divisional operations.

Essential Skills/Experience:

- At least 8 years' experience operating at Senior Management or Director level in a manufacturing, engineering or mining environment.
- Degree level qualification; BSc, BEng, HND or HNC in an Engineering Discipline.
- Be in commutable distance to the clients North Staffordshire location (generous relocation assistance available).
- Possess strong leadership skills with excellent commercial and financial acumen.
- Outstanding interpersonal, management and negotiation skills.
- Effective communication, presentation ability, both verbally and written.
- Understanding of a multifaceted business operation.

Client Information:

Located in North Staffordshire this global engineering business is synonymous with exacting high standards required in the field of precision engineering and the provision of complex engineering solutions to Nuclear, Aerospace and Defence sectors.

If you are looking for a high-profile and visible leadership position, offering challenge, job satisfaction with a forward thinking, progressive and profitable Company, then we look forward to hearing from you.
